## SUMMARY

Passionate Frontend Developer with experience in building dynamic and user-friendly web applications using React.js, JavaScript, HTML, and CSS. Familiar with version control (Git), debugging, and deploying scalable applications. Actively seeking Frontend Developer or Software Development Engineer (SDE) roles to create seamless, high-performance web experiences.

## SKILLS

- **Primary:** React, Tailwind, HTML, CSS, JavaScript
- **Secondary:** Node.js, Git, Wordpress, Figma

## EDUCATION

**Manav Rachna International Institute of Research & Studies**  
*Bachelor of Technology in Computer Science*

Faridabad, India  
2022 – 2026

## EXPERIENCE

### **Student Placement Cell Coordinator, Manav Rachna**

- As a Student Placement Cell Coordinator, I facilitate campus recruitment by coordinating with companies, organizing placement drives, and assisting students in interview preparation. I ensure smooth operations and support my peers in securing job opportunities through effective communication and organization.

### **MRSDC | [Management Head]**

- Experienced in community and event management, organizing technical workshops, hackathons, and coding competitions. Led volunteer teams, managed operations, and strategized growth to boost engagement and enhance learning experiences.

### **MRSDC | [Vice President]**

- Led community growth initiatives and strategic planning.
- Organized technical events, including workshops, hackathons, and coding competitions.
- Managed day-to-day operations and oversaw memberships for smooth execution.
- Guided volunteer teams to drive engagement and community expansion.
- Developed strategies to enhance learning experiences and participation.

## PROJECTS

### **The Potterpedia | Javascript, React.js**

- The Potterpedia is your go-to encyclopedia for all things Harry Potter, offering in-depth profiles of every character from the books and movies. The Potterpedia project covers key React concepts, including hooks for state management, API calls with Axios, and client-side routing with `react-router-dom`. It features real-time search filtering, error handling, and reusable components like `SearchBar`. UI/UX is improved with structured styling, while performance can be optimized using debouncing, lazy loading, and loading indicators. This project builds a strong foundation in React development, API integration, and dynamic UI rendering.

### **FashionGuide | JavaScript, React.js**

- The FashionGuide project leverages JavaScript and React.js to provide personalized outfit recommendations based on user preferences and occasions. It answers fashion-related queries using an API-driven approach, explores the latest fashion trends, and offers expert styling tips. With a dynamic and interactive UI, enhanced by Framer Motion animations, FashionGuide ensures a seamless user experience. Features like state management, client-side routing, and performance optimizations make it a strong foundation in React development, API integration, and personalized content delivery.
