EXPERIENCE

- **Manav Rachna International Institute Of Research And Studies** September 2024 – April 2025
Student Placement Coordinator
 - Coordinated campus recruitment drives and served as a key point of contact between companies and students.
 - Improved placement efficiency by streamlining communication and logistics.
 - Maintained placement records and ensured smooth execution of hiring processes.
- **Manav Rachna Student Developer Community** May 2024 – May 2025
Vice President
 - Led planning and execution of tech events including workshops, hackathons, and coding contests.
 - Managed a cross-functional student team, boosting engagement and expanding community reach.
 - Secured guest speakers and partnerships to enhance event quality and learning impact.
 - Mentored junior members and introduced systems to improve event feedback and planning.

PROJECTS

- **ShelfMate** March 2025
Tools: React.js, Gemini API 
 - Launched a personalized book recommendation app using React.js and the Gemini API, offering tailored suggestions based on user genre interests, and reading behavior.
 - Engineered a dynamic recommendation engine that processes real-time user input to deliver accurate, relevant book suggestions and enhance content discoverability.
- **Daily Prophet** February 2025
Tools: React.js, Harry Potter API 
 - Conceptualized and built a whimsical, Harry Potter-themed web application using React.js and the Harry Potter-API to immerse users in a magical browsing experience.
 - Implemented detailed character profile views and real-time search functionality, enabling users to instantly find and explore their favorite characters.
