SUMMARY

Passionate Frontend Developer with experience in building dynamic and user-friendly web applications using React.js, JavaScript, HTML, and CSS. Familiar with version control (Git), debugging, and deploying scalable applications. Actively seeking Frontend Developer or Software Development Engineer (SDE) roles to create seamless, high-performance web experiences.

SKILLS

- **Primary: React, Tailwind, HTML, CSS, JavaScript**
- **Secondary: Node.Js, Figma,C++**
- **Others: GitHub, Discord, Vercel, Community Management**

EDUCATION

Manav Rachna International Institute of Research & Studies   Delhi NCR, India
Bachelor of Technology in Computer Science   *2022 – 2026*

Projects

Daily Prophet | *React.js, HarryPotter-API*

- Conceptualized and built a whimsical, Harry Potter-themed web application using React.js and the HarryPotter-API to immerse users in a magical browsing experience.
- Implemented detailed character profile views and real-time search functionality, enabling users to instantly find and explore their favorite characters.
- Designed an interactive, lore-accurate UI inspired by the Daily Prophet newspaper to enhance fan engagement and showcase creative design skills.
- Achieved improved session duration and user satisfaction by integrating fantasy elements and seamless character discovery.

ShelfMate| *React.js, Gemini API*

- Launched a personalized book recommendation app using React.js and the Gemini API, offering tailored suggestions based on user mood, genre interests, and reading behavior.
- Engineered a dynamic recommendation engine that processes real-time user input to deliver accurate, relevant book suggestions and enhance content discoverability.

Experience

Student Placement Cell Coordinator

Manav Rachna International Institute of Research and Studies

- Coordinated campus recruitment drives and served as a key point of contact between companies and students.
- Organized mock interviews, resume workshops, and prep sessions to enhance placement readiness.
- Improved placement efficiency by streamlining communication and logistics.
- Maintained placement records and ensured smooth execution of hiring processes.

Vice President

Manav Rachna Student Developer Community

- Led planning and execution of tech events including workshops, hackathons, and coding contests.
- Managed a cross-functional student team, boosting engagement and expanding community reach.
- Secured guest speakers and partnerships to enhance event quality and learning impact.
- Mentored junior members and introduced systems to improve event feedback and planning .
